New IIC Highlights RSAC 2025 Launch Pad as a Showcase for the Next Generation of Cybersecurity Innovation

SAN FRANCISCO, Calif. — New IIC today highlighted **RSAC 2025 Launch Pad** as one of the conference's standout innovation programs, bringing early-stage cybersecurity startups to the forefront before investors, industry veterans, and the broader security community. RSAC describes Launch Pad as a **Shark Tank–style** forum where three finalists present bold ideas for strategy feedback and visibility.

At **RSAC 2025**, the official **Launch Pad finalists** were **Blue41, RunSybil, and The Hacking Games**, each selected to present emerging cybersecurity concepts during the conference. RSAC's Launch Pad page lists all three companies as the 2025 finalists.

The finalists pitched live on **April 29, 2025**, before a judging panel that included **Sarah Guo of Conviction Partners, Barmak Meftah of Ballistic Ventures, and Enrique Salem of Bain Capital Ventures**. RSAC's Day 2 recap noted that all three contenders delivered strong pitches, underscoring the role of Launch Pad as a platform for surfacing new ideas before they are fully commercialized.

"RSAC Launch Pad 2025 reflects the energy, ambition, and originality that continue to shape the future of cybersecurity," said **Vince Kohli, New IIC**. "Programs like Launch Pad matter because they give early innovators a visible platform to test bold ideas, engage with the cybersecurity ecosystem, and accelerate real-world impact."

Launch Pad stood out within the broader scale of **RSAC 2025**, which RSAC said drew **43,500+ attendees**, along with **730+ speakers**, **450+ sessions**, **400+ media members**, and **650+ exhibitors**. That scale made Launch Pad an especially meaningful stage for founders seeking visibility with customers, investors, and industry decision-makers.

RSAC's official materials reviewed here emphasize the **finalists and the session itself**. I did not find an official RSAC source naming a separate overall **Launch Pad 2025 winner**, so this draft avoids stating one.

About New IIC

New IIC is committed to spotlighting innovation, entrepreneurship, and emerging technologies that shape the future of industry and society.
